

RAISING EXPECTATIONS

Est. 1995

CORE PROGRAMS

Empowering youth in crisis with holistic support that helps them graduate on time and activate post-secondary plans.

5th - 8th Grade

PROJECT DREAM

Project DREAM serves late elementary and middle school students with academic enrichment and social discovery. By engaging youth early, we're able to cultivate long-term trust and accountability.

Summer Program

PROJECT RISE

Project RISE engages elementary and middle school-aged youth during the summer with science, technology, engineering, arts, and math projects. Robust summer programming ensures youth use the summer months for learning, exposure, and enrichment.

9th - 12th Grade

PROJECT STEMWARE

Project STEMWARE prepares students for graduation and post-secondary learning options. Students receive STEAM learning exposure, college access coaching, career exploration opportunities, and wrap-around support that prioritizes their emotional health.

Summer Program

YouthWORK

YouthWORK provides a simulated workplace experience during the summer months where high school-aged youth build confidence via exposure to workplace and career readiness skills and STEAM career exploration.

Project ELEVATE!

Project ELEVATE! helps RE college students make the most of their experience with course selection, career coaching, tuition planning, and more.

Project REstart

Project REstart supports formerly-enrolled young adults (ages 18-24) who have experienced unfortunate life circumstances and are ready to make a change.
